### In the Nation:

## 64% Show No Symptoms

Almost two thirds of women who die suddenly of coronary heart disease have no prior symptoms.<sup>4</sup>

## 50% Misdiagnosed

Women are 50% more likely to be given a wrong diagnosis after a heart attack<sup>5</sup>

## CPR Not Administered

Women are less likely to receive bystander CPR, decreasing their odds of survival,<sup>6</sup> and are more likely to die in the year following a heart attack than men<sup>7</sup>
