

WOMEN'S HEART ALLIANCE

Heart Disease is the No. 1 Killer of Women.

Women's hearts aren't like men's. Their symptoms aren't either. Yet, current research treats them all the same. The Women's Heart Alliance is fighting for equality in cardiovascular research, treatment and prevention. It's the only way we'll stop cardiovascular disease in women.

About the Women's Heart Alliance

The Women's Heart Alliance is dedicated to preventing women from needlessly facing and dying from heart disease and stroke. Working with two of America's leading medical institutions—the Barbra Streisand Women's Heart Center at Cedars-Sinai Heart Institute and the Ronald O. Perelman Heart Institute at New York-Presbyterian Hospital/Weill Cornell Medical Center—the Women's Heart Alliance is working to change research practices and improve the quality of care women receive for their heart health. With so many women's lives at stake, we have to make this a priority.

Did You Know?

400,000

Heart disease kills more women each year than all cancers combined.

50%

Women are 50% more likely to be given a wrong diagnosis after a heart attack, and are at greater risk of dying in the first year after.

2/3

Women's hearts are two-thirds the size of men's.

1/2

In nearly half of all heart attacks among women, typical male symptoms are not present.

\$1 trillion

By 2035, more than 45% of Americans are projected to have cardiovascular disease, with annual costs expected to reach \$1 trillion.

A Path Toward Progress

Bold and Breakthrough Research

Meaningful change can only happen when we're willing to push past the norms. Through bold and breakthrough cardiovascular research, modeled after major advancements in cancer, we will tackle the gender inequity in research head-on.

"Most of what we know about heart disease has come from research done on men, designed for men. And this has greatly benefited men, but women have not fared as well."

— **Dr. Holly Andersen**, WHA Medical Advisor, and Director of Education and Outreach at the Ronald O. Perelman Heart Institute and attending cardiologist at New York-Presbyterian/Weill Cornell Medical Center

Universal Knowledge of Women's Heart Attack Symptoms

Women's hearts are smaller and their risk factors are different. Yet, less than half of primary care physicians and cardiologists feel well-prepared to assess cardiovascular disease in women. Physicians need to be educated on women's cardiovascular disease. Women need to know their symptoms are different. When it comes to heart disease and stroke, women and men are not the same.

"Many women go to the hospital with chest pain but they often aren't tested for a heart attack because doctors felt they were low-risk. And they are considered low-risk because their heart disease symptoms are different than the symptoms men experience."

— **Dr. C. Noel Bairey Merz**, WHA Scientific Advisor, Director of the Barbra Streisand Women's Heart Center in the Smidt Heart Institute at Cedars-Sinai Heart Institute

WOMEN'S HEART ALLIANCE

Women's Heart Alliance Scientific Advisory Board

Dr. Holly Anderson — Co-Chair	New York-Presbyterian Hospital	New York, NY
Dr. C. Noel Bairey Merz — Co-Chair	Cedars-Sinai Heart Institute	Los Angeles, CA
Dr. Bina Ahmed	Dartmouth Hitchcock	Lebanon, NH
Dr. Natasha Altman	University of Colorado School of Medicine	Aurora, CO
Dr. Helen Barold	Sibley Memorial Hospital	Washington, D.C.
Dr. Giselle Baquero	Southern Illinois University School of Medicine	Springfield, IL
Dr. Natalie Bello	Columbia University Medical Center	New York, NY
Dr. Katie Berlacher	University of Pittsburgh	Pittsburgh, PA
Dr. Sherry-Ann Brown	Mayo Clinic	Rochester, MN
Dr. Renee Bullock-Palmer	Deborah Heart and Lung Center	Browns Mills, NJ
Dr. Lori Daniels	UCSD Division of Cardiovascular Center	La Jolla, CA
Dr. Claire Duvernoy	Michigan Medicine, University of Michigan	Ann Arbor, MI
Dr. Eugenia Gianos	Lenox Hill Hospital	New York, NY
Dr. Martha Gulati	University of Arizona — Phoenix	Phoenix, AZ
Dr. Sharonne Hayes	Mayo Clinic	Rochester, MN
Dr. Paula Johnson	Harvard Medical School	Boston, MA
Dr. Lilian Khor	University of Utah School of Medicine	Salt Lake City, UT
Dr. Emily Lau	Massachusetts General Hospital	Boston, MA
Dr. Jennifer Lewey	University of Pennsylvania Perelman School of Medicine	Philadelphia, PA
Dr. Sandra Lewis	Legacy Emanuel Medical Center	Portland, OR
Dr. Gina Lundberg	Emory Clinic	Atlanta, GA
Dr. Radmila Lyubarova	Albany Medical Center	Albany, NY
Dr. Suzan Mahdai	Wayne State University	Detroit, MI
Dr. Kathleen Mansour	Delta Regional Medical Center	Greenville, MS
Dr. Laxmi Mehta	Ohio State University Wexner Medical Center	Columbus, OH
Dr. Marla Mendelson	Northwestern Medicine	Chicago, IL
Dr. Jennifer Mieres	North Shore-LIJ Health Systems	Long Island, NY
Dr. Patricia A. Pellikka	Mayo Clinic	Rochester, MN
Dr. Carl Pepine	University of Florida	Gainesville, FL
Dr. Rita Redberg	University of California San Francisco Medical Center	San Francisco, CA
Dr. Judy Regensteiner	University of Colorado School of Medicine	Aurora, CO
Dr. Harmony Reynolds	New York University Langone Hospitals	New York, NY
Dr. Nandita Scott	Massachusetts General Hospital	Boston, MA
Dr. Audrey Sernyak	Christiana Care Health System	Middletown, DE
Dr. Garima Sharma	Johns Hopkins Bayview Medical Center	Baltimore, MD
Dr. Leslee Shaw	Weill Cornell Medical College	New York, NY
Dr. Toniya Singh	St. Louis Heart and Vascular	St. Louis, MO
Dr. Suzanne Steinbaum	Mt. Sinai Heart	New York, NY
Dr. Ritu Thamman	Allegheny General Hospital	Pittsburgh, PA
Dr. Eric Topol	Scripps Research Institute	San Diego, CA
Dr. Patti Vassallo	Northwestern Medicine	Chicago, IL
Dr. Annabelle Volgman	Rush University Medical Center	Chicago, IL
Dr. Mary Norine Walsh	St. Vincent	Indianapolis, IN
Dr. Karol Watson	David Geffen School of Medicine at UCLA	Los Angeles, CA
Dr. Nanette Wenger	Emory University	Atlanta, GA
Dr. Stephanie Windish	Mercy St. Louis Hospital	St. Louis, MO
Dr. Malissa Wood	Massachusetts General Hospital	Boston, MA
